

## Grifron®-Pro D-fraction® (Liquid)

D-fraction Extract in concentrated form

Grifron®-Pro D-fraction® was originally designed for the use by health-care professionals to enhance immune system function.\*

It is the ingredient present in all major studies on the health benefits of mushrooms conducted in Japan and the United States.

Grifron® -Pro D-fraction® is the only product that has established a credential as authentic product of D-fraction extract. Since the introduction of the product to health-care professionals, the product has received overwhelming acceptance.

Maitake D-fraction® is the registered trademark of Maitake Products, Inc. who holds the exclusive right to use the tradename.

### Technical View on D-fraction:

D-fraction is a highly standardized and purified beta-1,6 glucan (1,6 main chain with 1,3 branches in its chemical structure) and beta-1,3 glucan (1,3 main chain with 1,6 branches in its chemical structure) with about 30% of protein, extracted from Maitake mushroom fruit body. D-fraction has the unique polysaccharide compound. The degree of branching is greater than that of 1,3 beta-glucan often found in other medicinal mushrooms. Researchers theorize that the complexity of branching may make Maitake superior to other beta-glucan products. An essential fact about the D-fraction is that it is effective when consumed orally.

### Research Updates on D-fraction:

D-fraction is being studied not only in Japan, but also in the United States by various prominent institutes. Some of the recent studies indicate that D-fraction is possibly useful in conjunction with conventional chemotherapeutic agents, by not only improving the agent's positive benefits, but it also aids in the amelioration of many of the side effects of the agents.

### Product Specifications:

Grifron® -Pro D-fraction® contains 900mg pure Maitake D-fraction compound. One drop of Grifron® -Pro D-fraction® contains approximately 1mg of pure Maitake D-fraction compound. The product is alcohol free. Grifron® -Pro D-fraction® is available in 1 oz. and 2 oz. sizes.

### Usage:

For general use as a dietary supplement, 5-6 drops of Grifron® -Pro D-fraction® three times daily between meals. For maximum impact, Maitake D-fraction can be consumed in amounts from 0.5 mg to 1.0 mg per kilo of

body weight per day. (Note: To find out your weight in kilos, multiply your weight in pounds times 0.45. Example : 150 lb.= 68 kilos (150 x 0.45). The total daily amount derived from this maximum dosing ranges 34 mg to 68 mg of pure D-fraction, which is approximately equivalent to 34 to 68 drops of Grifron<sup>®</sup> -Pro D-fraction<sup>®</sup> . Use as instructed by your health-care professionals. The benefits of Maitake D-fraction may be maximized if combined with whole Maitake mushroom products.

### Toxicity:

To date there has been no evidence to suggest any toxicity for either Maitake mushroom or the Maitake D-fraction both of which are recognized as safe and laboratory test results indicate no toxicity.

### Applications:

Grifron<sup>®</sup> -Pro D-fraction<sup>®</sup> is specially geared for the people who seek enhanced immune system function.
